

NH Envirothon Basics

What is the [NHE](#)?

- Outdoor skills and knowledge focused on soil and land use, wildlife, forestry, and aquatic ecology.
- Team building and teamwork towards a common goal.
- Community and statewide environmental explorations, conversations, and networking.
- Professional and scientific networking.
- Research and analysis of the current environmental issue challenge.
- Social, ecological, cultural, political, economic connections.
- Enhanced creative and critical skills.
- Real world skills and applications.
- Environmental education, leadership, and problem-solving.
- The NH State HS Academic competition winners compete at → the international competition at the [NCF Envirothon](#).

Live Free and Conserve!

*2027 Current Environmental Issue Theme – **Soil Health Management: Agricultural Principles and Stewardship.***

How does it work?

- Teams of 5 students train for the May competition. Schools may have up to 3 teams.
 - Teams are typically from NH high schools.
 - Middle school teams (grades 6-8) are welcome to compete in the NHE MS category.
 - The NHE is open to all HS students. It can also be sponsored by an agricultural, scout, or community, or homeschool group if the school doesn't have a team.
- Team preparation varies by school: some meet as a club once a week after school all year, some work as a special project within a class, some meet as a 2nd semester group, etc. What will work for you?
- It's often coached by a science, environmental education, or social studies teacher.
- Student and teacher training is available via live and online workshops and postings.
- NHE leaders review, choose, and adapt [NCFE](#) learning objectives to the current issue theme. NHE leaders also develop resources for NHE postings, practice, and study.

The NH Envirothon is under the direction and sponsoring of the NHACD.

Scientists and professionals in natural resources plan and lead the training and competition.
